

# Weighing tables

- As an experienced manufacturer of laboratory furniture, we offer a wide range of weighing tables. Our tables are available in different versions, both metal and laminated, to meet your needs and preferences.
- Anti-vibration weighing tables that we offer ensure effective protection of measuring equipment against vibrations and shocks. Thanks to the use of special vibration isolators, the working plates are perfectly seated, guaranteeing comfortable working conditions with the scale. Our weighing tables are perfect for laboratory and measuring rooms, ensuring stability and precision during weighing.

> The solid construction of our anti-vibration weighing tables ensures that the pressure exerted on the table top is not transferred to the base of the scale. We offer three standard sizes of anti-vibration tables that can be adapted to virtually any type of tabletop.

> In our assortment you will find laboratory weighing tables:

With one or two anti-vibration plates,

With or without auxiliary cabinets.

We are also able to fulfill an order for weighing tables with non-standard

dimensions, tailored to the individual needs and requirements of the customer.

Our goal is to provide you with the perfect weighing table that will meet all your expectations.

> Choose our anti-vibration weighing tables and enjoy precision, reliability and comfort while working in the laboratory.
